

Aryan Jaiswal

Full Stack Developer | Software Engineer

+91 81691 50113 | aryanjaiswal3080@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Technical Skills

- **Programming Languages:** Java, JavaScript, TypeScript, Python, SQL
- **Frontend:** React 19, TypeScript, Tailwind CSS, Zustand, TanStack Query, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, GraphQL, Socket.IO, JWT, OAuth
- **Databases and ORMs:** PostgreSQL, MongoDB Atlas, Prisma ORM, Mongoose, Firebase, Firestore
- **Testing and Developer Tools:** Vitest, Supertest, React Testing Library, Postman, Git, GitHub, Docker, CI/CD, Vercel, Render, Neon, Cloudinary, VS Code
- **Software Engineering:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Authentication & Authorization, Database Transactions

Experience

Backend Developer

Jun 2026

SortMyScene

Remote

- Developed and maintained a scalable backend for [SeatSync](#), a real-time event-booking platform, using Node.js and Express.js, delivered end-to-end as the sole backend engineer.
- Designed and optimized the MongoDB database structure with transactions and conditional updates, eliminating race conditions and guaranteeing zero conflicting reservations under concurrent load.
- Built and managed a RESTful API with JWT authentication and rate limiting, and troubleshoot/debugged reservation-expiry logic backed by automated concurrency and integration tests.

Open Source Contributor

Jan 2025

Social Winter of Code

Remote

- Contributed bug fixes, feature implementations, and documentation improvements across 3+ open-source repositories.
- Achieved 15+ merged pull requests and participated in 10+ code reviews, incorporating maintainer feedback and following collaborative Git workflows.

Projects

PlacementOS – AI Placement Operating System

[Live](#) | [GitHub](#)

React 19, TypeScript, Node.js, Express.js, PostgreSQL, Prisma ORM, Socket.IO, Groq AI, Firebase

- Architected and deployed a scalable full-stack platform integrating 6+ workflows including DSA tracking, AI Resume Analyzer, Interview Replay, readiness analytics, AI Daily Planner and structured placement roadmaps.
- Built and maintained RESTful APIs using Node.js and Express.js with role-based authorization, and designed the relational database schema in PostgreSQL via Prisma ORM for optimized queries and data integrity.
- Integrated third-party services including Socket.IO, Firebase Google OAuth, Cloudinary, and the Groq AI API, and collaborated closely with the frontend to ensure smooth API integration and consistent data flow.
- Optimized performance, security, and scalability with JWT auth, refresh token rotation, bcrypt hashing, Cloudflare Turnstile, and rate limiting; wrote 100+ automated tests (Vitest, Supertest, RTL) and eliminated all high/critical dependency vulnerabilities.

LeetWeave Scribe – CLI + Chrome Extension for LeetCode Automation

[GitHub](#)

TypeScript, Node.js, Manifest V3, GitHub API, Groq API, Vitest, CI/CD

- Engineered a dual-runtime automation tool that auto-organizes and pushes LeetCode solutions to GitHub, cutting per-problem manual work by 97%+ (3 min to under 5 sec), with a shared core engine powering both the CLI and Chrome extension.
- Backed the shared engine with 48 automated tests via Vitest and a CI/CD pipeline, ensuring reliable behavior across both runtime targets on every change.
- Diagnosed and resolved a live GitHub API versioning break through direct network-traffic analysis, restoring push functionality without downtime.
- Integrated the Groq API to auto-generate AI-powered solution notes with isolated failure handling, and bundled a 2,900-problem offline dataset to remove a runtime network dependency.

SaarthiAI – AI Insurance Advisory Platform

[Live](#)

React.js, Firebase Authentication, Grok API, Llama 3.3

- Built and deployed a context-aware insurance advisory app, used by 50+ users, integrating LLM APIs for bilingual, voice-enabled guidance on marriage, childbirth, home-purchase, and retirement scenarios.
- Implemented PII masking, bias-aware recommendation safeguards, Firebase Authentication, and privacy controls aligned with India's DPDP Act, 2023.

Education

Bachelor of Engineering in Information Technology; CGPA: 9.3/10

2024 – 2028

Thakur College of Engineering and Technology

Mumbai, India

Higher Secondary Certificate; Percentage: 76%

Narayana Junior College

2024
India

Achievements and Certifications

- **Research:** Published and presented "Air Pollution: Sources, Pollutants, Health Impacts and Future Mitigation Strategies" at MULTICON-W 2026 (IC-HSTE).
- **Hackathons:** Participated in 7+ hackathons, reached the finals in 3, including a top result in InnovGenius (with TCS).
- **Mathematics Olympiad:** Secured Rank 16 at the college level in NLMO 2025.
- **Certifications:** TCS iON Young Professional; freeCodeCamp Responsive Web Design. [View More](#)
